

May is Neurofibromatosis Awareness Month

LET'S MAKE NF  
**SHINE**  
BLUE & GREEN ON MAY 17

**Make NF Shine** is an initiative that brings NF out of the shadows and into the community as part of NF Awareness Month.

By lighting up buildings, monuments and landmarks blue and green on May 17, we put NF in the spotlight and start a national conversation about a condition that has been invisible for far too long.

**What is NF?** Neurofibromatosis (NF) is a genetic condition that causes tumours to form on nerves in the body, including the brain and spine.

It is unpredictable, progressive and there is no cure...but there is hope.

**What you can do**

- Head to the website to check dates and locations
- Post a photo on your social media platforms (or share ours); tag us @ctfaustralia and use the campaign's official hashtag #outoftheshadows
- Don't see your town or city? Get in touch and we will work with you to submit a request (if not already done)

The Children's Tumour Foundation is the only dedicated support service for those impacted by Neurofibromatosis in Australia.
